Overview

This cheatsheet contains folding illustrations for a few different folding techniques.

- File fold for bottoms
- Roll for bottoms
- File fold for tops
- Space-saving rolls for tops

I recommend that you test them all out to see what you like the most.

The file folds and the regular roll are easiest to do, while the Space-saving roll is a little more tricky.

Overview

Folds for bottoms will work for pants and other long-legged garments like stockings without modification.

For shorter garments like underwear, shorts and skirts you should skip step 3 during the file-fold.

Folds for tops will generally work for all tops. Obviously you can't fold in the arms if there aren't any but that is fine.

Try to avoid using the space-saving roll on delicate clothes and ones that stretch or crease easily.

You can modify both the regular roll and the space-saving roll by adding or removing a pocket (see step 2 on Rolling Clothes to Save Space) at the waist of bottoms, and at the bottom of tops.

Overview

I also offer two premium versions of this cheatsheet. They contain step-by-step illustrations like these for every type of clothing in addition to dedicated step-by-step videos for each of the folds as well.

The first one is called The Fast File-Folding Guide. You can check it out by [tapping here](#).

The second one is called The Space-Saving Rolls Guide. And you can check this one out by [tapping here](#).

If you are interested in getting organized I highly recommend them.

I also offer a [14-Day Wardrobe Organizing Challenge](#) that you can check out if you're up for the challenge.
